

The Queen's University Institute for Energy and Environmental Policy is hosting a one-day conference on the future of coal-generated electricity in Ontario.

The conference entitled "*The Future of Coal in Ontario?*" will feature academics and experts in the field of energy policy, natural resources, public administration and the environment discussing the issue of coal-fired generation from an Ontario and international perspective.

"The conference will discuss one of the most pressing energy and environmental policy issues of our time, not only in Ontario, but in North America and the world," said Dr. Bryne Purchase, Executive Director, Queen's University Institute for Energy and Environmental Policy.

Conference Details

Date: Thursday, May 10, 2007

Location: The Old Mill
21 Old Mill Road (near Bloor and Kingsway)
Toronto, Ontario

The conference will be chaired by Sean Conway, Former Cabinet Minister and Special Advisor for External Relations to the Principal of Queen's University.

The conference sponsor is the Council for Clean and Reliable Electricity, an independent a not-for-profit, public policy and research organization established to contribute to the policy debate on the future development of Ontario's electricity system.
